Contents Volume 198 (1998)

Assessment of the Zn status of chickpea by plant analysis
H.R. Khan, G.K. McDonald and Z. Rengel **1–9**

Chickpea genotypes differ in their sensitivity to Zn deficiency
H.R. Khan, G.K. McDonald and Z. Rengel **11–18**

Fine root turnover of irrigated hedgerow intercropping in Northern Kenya
J. Lehmann and W. Zech **19–31**

The influence of arsenic chemical form and concentration on *Spartina patens* and *Spartina alterniflora* growth and tissue arsenic concentration
A.A. Carbonell-Barrachina, M.A. Aarabi, R.D. DeLaune, R.P. Gambrell and W.H. Patrick, Jr. **33–43**

Impact of faunal complexity on nutrient supply in field mesocosms from a spruce forest soil
S. Zechmeister-Boltenstern, A. Baumgarten, A. Bruckner, C. Kampichler and E. Kandeler **45–52**

Influence of phosphorus on the growth and ergot alkaloid content of *Neotyphodium coenophialum*-infected tall fescue (*Festuca arundinacea* Schreb.)
D.P. Malinowski, D.P. Belesky, N.S. Hill, V.C. Baligar and J.M. Fedders **53–61**

Evaluation of the stem injection technique and subsequent ^{15}N partitioning in red alder crowns
C.W. Swanston and D.D. Myrold **63–69**

Phosphorus uptake by bean nodules
T.S. Al-Niemi, M.L. Kahn and T.R. McDermott **71–78**

A new membrane tube technique (METT) for continuous gas measurements in soils
A. Gut, A. Blatter, M. Fahrni, B.E. Lehmann, A. Neftel and T. Staffelbach **79–88**

Soil gas fluxes of N_2O, CH_4 and CO_2 beneath *Lolium perenne* under elevated CO_2: The Swiss free air carbon dioxide enrichment experiment
P. Ineson, P.A. Coward and U.A. Hartwig **89–95**

A survey of soils for aggregate stability and glomalin, a glycoprotein produced by hyphae of arbuscular mycorrhizal fungi
S.F. Wright and A. Upadhyaya **97–107**

An extraction method for nematodes in decomposition studies using the minicontainer-method
R. Lenz and G. Eisenbeis **109–116**

Influence of fulvic acid on transport of iron in soils and uptake by paddy seedlings
S.B. Pandeya, A.K. Singh and P. Dhar **117–125**

Low concentrations of ammonium inhibit specific nodulation (nodule number g^{-1} root DW) in soybean (*Glycine max* [L.] Merr.)
R.H. Gulden and J.K. Vessey 127–136

Changes in carbon, nitrogen and phosphorus levels due to deforestation and cultivation: A case study in Simlipal National Park, India
H. Saikh, C. Varadachari and K. Ghosh 137–145

Direct evidence on participation of root hairs in phosphorus (^{32}P) uptake from soil
T.S. Gahoonia and N.E. Nielsen 147–152

Cultivar differences in boron uptake and distribution in celery (*Apium graveolens*), tomato (*Lycopersicon esculentum*) and wheat (*Triticum aestivum*)
N. Bellaloui and P.H. Brown 153–158

Soil phosphorus fractions and adsorption as affected by organic and inorganic sources
G. Nziguheba, C.A. Palm, R.J. Buresh and P.C. Smithson 159–168

Interactions of an acid tolerant strain of phosphate solubilizing bacteria with a few acid tolerant crops
S.S. Pal 169–177

Nitrogen and drought effects on ectomycorrhizae of Norway spruce [*Picea abies* L. (Karst.)]
P. Nilsen, I. Børja, H. Knutsen and R. Brean 179–184

Changes in mycorrhiza development in maize induced by crop management practices
M.E. Gavito and M.H. Miller 185–192

Effects of water percolation on methane emission from rice paddies: a lysimeter experiment
K. Yagi, K. Minami and Y. Ogawa 193–200

Nitrification and occurrence of *Nitrobacter* by MPN-PCR in low and high nitrifying coniferous forest soils
V. Degrange, M.M. Coûteaux, J.M. Anderson, M.P. Berg and R. Lensi 201–208

Growth response of native shrubs to acid mine spoil and to proposed soil amendments
P.J. Voeller, B.A. Zamora and J. Harsh 209–217

Bacterial diversity in the bulk soil and rhizosphere fractions of *Lolium perenne* and *Trifolium repens* as revealed by PCR restriction analysis of 16S rDNA
L. Marilley, G. Vogt, M. Blanc and M. Aragno 219–224

Volume contents 225–226

Author index 227

Instructions to authors 229–231
